

All Party Parliamentary Group for Intelligent Energy

23rd May 2005

Reception reminder: 'Microgeneration – Power for the People'

Just a reminder about the reception we are sponsoring on microgeneration. As you will be aware micropower (the production of sustainable heat or power by individual or small groups of consumers) has many benefits. These include helping to reduce CO₂, involve consumers in climate change matters, protect security of supply and assist with Third World poverty. These benefits can be obtained by the policy initiatives contained in the Electricity (Microgeneration) Bill which was tabled at the end of the last parliament by a cross party group of MPs (see attached newsletter for further information).

The reception will be held in the **Jubilee Room on Wednesday 25 May from 6.30-8.00 pm.** Speakers will include Alan Simpson MP, Dave Sowden – Chief Executive of the Micropower Council, Eddie Hyams –Chairman of the Energy Savings Trust and an industry speaker. There will also be the chance to discuss the issues further. **Refreshments will be available.**

For further information and to RSVP, please contact Jane Vaus at jane.vaus@btinternet.com or 020 7924 0795.

Many thanks

David Chaytor MP
Dave Sowden
Eddie Hyams
